As part of the monitoring process, our Investment Adviser has developed risk policies pursuant to which it regularly assesses the risk profile of each of our debt investments and rates each of them based on the following categories, which we refer to as "Internal Risk Ratings":

Internal Risk Ratings Definitions

Rating Definition

- 1 *Performing--Low Risk:* Borrower is operating more than 10% ahead of the base case.
- 2 *Performing--Stable Risk:* Borrower is operating within 10% of the base case (above or below). This is the initial rating assigned to all new borrowers.
- 3 *Performing--Management Notice:* Borrower is operating more than 10% below the base case. A financial covenant default may have occurred, but there is a low risk of payment default.
- 4 *Watch List:* Borrower is operating more than 20% below the base case and there is a high risk of covenant default, or it may have already occurred. Payments are current although subject to greater uncertainty, and there is moderate to high risk of payment default.

5 *Watch List--Possible Loss:* Borrower is operating more than 30% below the base case. At the current level of operations and financial condition, the borrower does not have the ability to service and ultimately repay or refinance all outstanding debt on current terms. Payment default is very likely or may have occurred. Loss of principal is possible.

6 *Watch List--Probable Loss:* Borrower is operating more than 40% below the base case, and at the current level of operations and financial condition, the borrower does not have the ability to service and ultimately repay or refinance all outstanding debt on current terms. Payment default is very likely or may have already occurred. Additionally, the prospects for improvement in the borrower's situation are sufficiently negative that impairment of some or all principal is probable.

Our Investment Adviser's risk rating model is based on evaluating portfolio company performance in comparison to the base case when considering certain credit metrics including, but not limited to, adjusted EBITDA and net senior leverage as well as specific events including, but not limited to, default and impairment.

Our Investment Adviser monitors and, when appropriate, changes the investment ratings assigned to each debt investment in our portfolio. In connection with our quarterly valuation process, our Investment Adviser reviews our investment ratings on a regular basis. The following table summarizes the Internal Risk Ratings of our debt portfolio as of September 30, 2017 and June 30, 2017:

	September 30, 2017		June 30, 2017

(dollar amounts in millions)				
Internal Risk Rating 1	\$ 75.1	4.27 %	\$ 41.9	2.76 %

Consolidated Results of Operations

(dollar amounts in thousands, except per share data)

Total investment income for the three month periods ended September 30, 2017 and June 30, 2017 was \$42,648 and \$38,744, respectively. This \$3,904 net increase was primarily due to an increase in interest income from our debt portfolio and an increase in interest income and dividend income from Credit Fund, partially offset by a reduction in other income, during the three month period ended September 30, 2017.

Total expenses (net of management fee waiver) for the three month periods ended September 30, 2017 and June 30, 2017 were \$17,568 and \$17,296, respectively. This \$272 net increase during the three month period ended September 30, 2017 was primarily attributable due to an increase in management fees as a result of an increase in investments, partially offset by a decrease in professional fees.

During the three month period ended September 30, 2017, the Company recorded a net realized gain and change in unrealized appreciation of \$463. This was primarily due to net change in unrealized appreciation on our debt investments from changes in various inputs utilized under our valuation methodology, including, but not limited to, market spreads, leverage multiples and borrower ratings, and the impact of exits.

Liquidity and Capital Resources

(dollar amounts in thousands, except per share data)

As of September 30, 2017, the Company had cash and cash equivalents of \$35,149, notes payable (before debt issuance costs) of \$273,000, and secured borrowings outstanding of \$578,769.
